

Definitive Surgical Trauma Care (DSTC) Course

DSTC & DATC Australia and New Zealand in association with IATSIC (International Association for Trauma Surgery and Intensive Care) announce courses for 2026.

THE DSTC COURSE IS THE PERFECT OPPORTUNITY TO FOCUS ON:

- Surgical decision-making in complex scenarios
- Operative techniques in critically ill trauma patients
- Hands on practical experience with skilled instructors (both national and international)
- Haemorrhage control techniques and the ability to handle major thoracic, cardiac and abdominal injuries.

DSTC is recommended by the Royal Australasian College of Surgeons for all consultant surgeons and final year trainees (registration only available to qualified surgeons and surgical trainees in their final two years of advanced training).

The Military Module is an optional and separate one day course for interested clinicians and Australian Defence Force personnel and will be held in Brisbane in 2026 TBC.
