

Business Analyst

Health
South Western Sydney
Local Health District

What is a Business Analyst?

A Business Analyst is a person who facilitates the process of introducing a computer application to a specific department or discipline within an organisation. This person speaks to the IT department about the potential user's needs and conversely speaks with the potential user on behalf of the IT department.

Roles of a Business Analyst

- Liaise with Hospital/Health staff in analysing and documenting Business Processes, both current and preferred
- Assist with Business Case development to justify allocation of resources for implementation of an application
- Advise Hospital/Health staff in implementation of software
- Facilitate workshops
- Assist informal evaluation of software systems that may be implemented
- Supervise application support staff
